Description

- Double nipples (G1/4) required for block mounting with other devices
- Pressure setting can be locked with lock nut
- Flow direction indicated by arrows
- **Entry in direction of arrow**
- Pressure gauge **not** included, can be mounted at both ends
- Panel mounting with nut on cover
- Wall mounting with mounting bracket on body

Operation

- The regulator is only allowed to be operated with micro-filtered air (filter rating 0.01 µm) (Section 1)
- **Control range > 7 bar:** p₁ must be continuously applied to the regulator. The regulating spring must be relieved if the pressure supply fails (by unscrewing the adjusting screw)
